Teams

- One app for everything simplifies collaboration
- Telephony, screen sharing, chats, access to central file storage

Integration by Green

- Integration of the solution into your network
- Make phone calls via the Teams app or special Teams VoIP phones

Features

Green Teams Telephony lets you propel your business communications into the future. Use Microsoft Teams to make phone calls via your existing phone numbers and settings. As a certified provider, we can offer you the entire communications package from one source.

Location-independent subscribers

Forward-looking, location-independent collaboration: Your employees can communicate hassle-free from wherever they happen to be and on all standard devices.

Make calls from a computer

Use Teams to make calls using your own phone numbers. You benefit from both seamless integration into the Office 365 system and compatibility with countless third-party applications. Do you want to use your existing numbers when calling with Teams and transfer them to Green? Or would you like to receive new phone numbers?

Conference calls and video conferences

Invite your employees, customers or business partners to conference calls and video conferences. Show your presentation online or share a participant's screen.

Security

Define a maximum amount (cap limit) to protect yourself against hacker attacks or unpleasant surprises on your next phone bill.

Certified SBC partner

We use our own Green Session Border Controller (SBC) to manage the interface between Microsoft Teams and your (virtual) telephone system, the SIP trunk. Green will configure Teams Telephony for you. That includes: configuring the SBC domain and direct routing, setting up a PSTN gateway, activating users, voice routing and setting up the corresponding policies.

Licenses for Microsoft 365

Easily transfer existing licenses to Green or, if you need any licenses or license upgrades, purchase them directly from us. We offer the best prices on Microsoft Office 365 licenses.

Attractive minute packages

Does your company primarily make calls to fixed network and mobile phone numbers in Switzerland? Benefit from attractive packages with minutes included on calls made in Switzerland. Or do you make international calls? Then select the World minute package.
