Housing for individual requirements

Set up your IT environment in your own self-contained suite in our data center. Suites range in size from 20 to several hundred square meters.

The suites (Flex Spaces) are separated from each other by walls or steel mesh partitions with privacy screens. Choose the individual setup and configuration options that suit your precise needs. We fit your racks or special racks in your data center suite and install your IT equipment according to your requirements.

Our offer

- ✔ Enormous flexibility with uncompromising security
- ✔ State-of-the-art access protection
- ✔ Optional safe racks and EMP protection

- ✔ Racks and rack layouts customizable to meet your needs
- ✔ Flex Space and data center halls are set up in accordance with your layout specifications
- ✔ Optional: use your own video surveillance or special locking systems

- ✔ Redundant Internet Access
- ✔ Geo-redundant installations with multiple data center locations
