

greenVDSL (G. Fast)

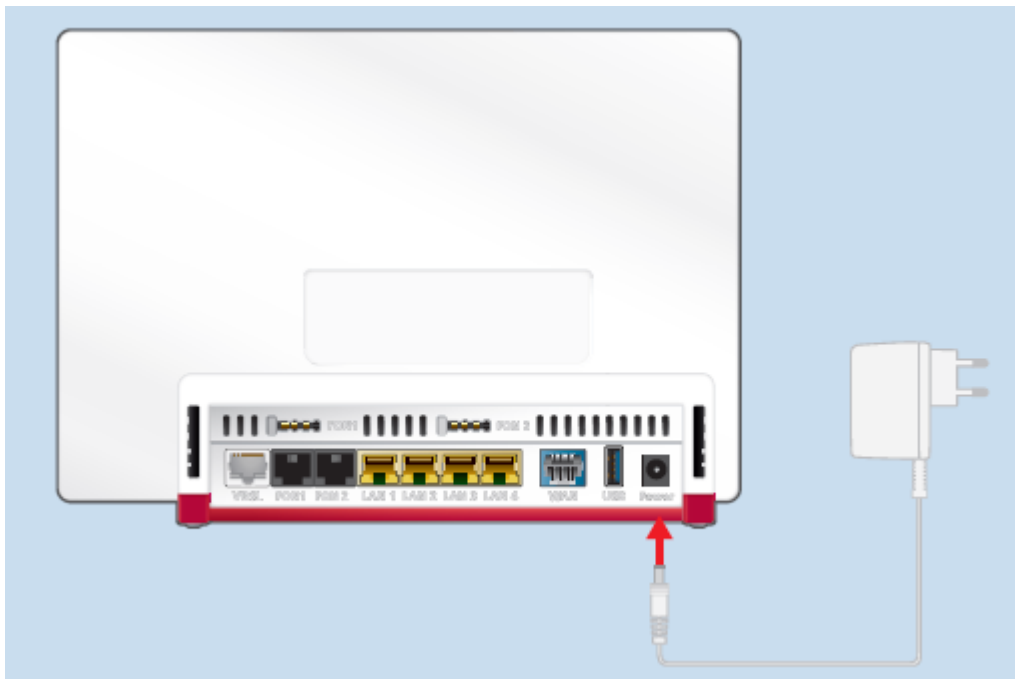

FRITZ!Box 7583

Installation / Internet Connection

1 Connect the FRITZ!Box

1.1 Connect power adapter

Connect the power adapter with your FRITZ!Box and the power socket. “Power” LED starts blinking green. After a few seconds the “Power” LED will shine constantly. The FRITZ!Box is now ready for operation.

1.2 DSL cable

Use the Y-cable (DSL cable) supplied. Connect the FRITZ!Box to the telephone socket with one of the long cable ends. Connect the short end to the FRITZ!Box at "DSL".

The FRITZ!Box establishes the Internet connection and restarts itself.
This process can take up to 15 minutes.

2 Network connection to your computer

2.1 Connection with network cable

If you connect your computer with a network cable, attach the yellow cable to a free LAN port on your FRITZ!Box.

2.2 Wireless network connection

If you connect your computer with a wireless connection (WLAN) you need its name and password. Your FRITZ!Box is already configured for a wireless connection. Your wireless-name (SSID) and the password for the wireless connection are on the back of your FRITZ!Box.

3 Configuration of the FRITZ!Box

3.1 Access your Fritz!Box

First you must connect to the FRITZ!Box user interface. Make sure that your computer is connected to the FRITZ!Box by network cable or WLAN.

Following enter "fritz.box" or 192.168.178.1 in your browser's address line (e.g Internet Explorer or Safari)."

3.2 Select language

Select "English" and confirm with "OK"
